# SUCCESSFUL WATER WELLS BEGIN WITH DELTA SCREENS.

When it comes to water wells, you want to do it right the first time. This means using products that perform as billed.

Delta Screens products are built to the highest standards. Our water well screens are available in 304 or 316 stainless steel and diameters ranging from 1-1/4" to 20". We track manufacturing from the moment raw materials arrive to the second a screen is shipped. We do this as part of our total quality assurance and quality control program. It guarantees the highest possible performance and longevity.

## NEVER WAIT FOR QUALITY.

Quality is critical. There's no question about it. That's why Delta Screens has developed the most modern facility in the industry. We designed it to optimize new manufacturing processes that will produce high quality and top performing products.

While quality is critical, on-time delivery is a must. Modern procedures streamline the manufacturing process that will drive reduced lead times from order to shipment.

## WE'RE NOT ASKING FOR TRUST. WE'RE ENSURING SATISFACTION.

At Delta Screens, we're a seasoned team of veterans who have been around the water well industry for a long time. What's more, our firsthand experience has taught us much. We understand the needs of drillers and distributors alike. We know what is needed and expected. That's why our focus is on delivering the best overall value in the business. Put us to the test. Let Delta Screens prove that value for you.

*Manufactured at the most modern facility in the industry,  
a Delta Screens product is built to ISO 2001 standards.*
