OUR QUALITY COMES THROUGH

# DELTA SCREENS

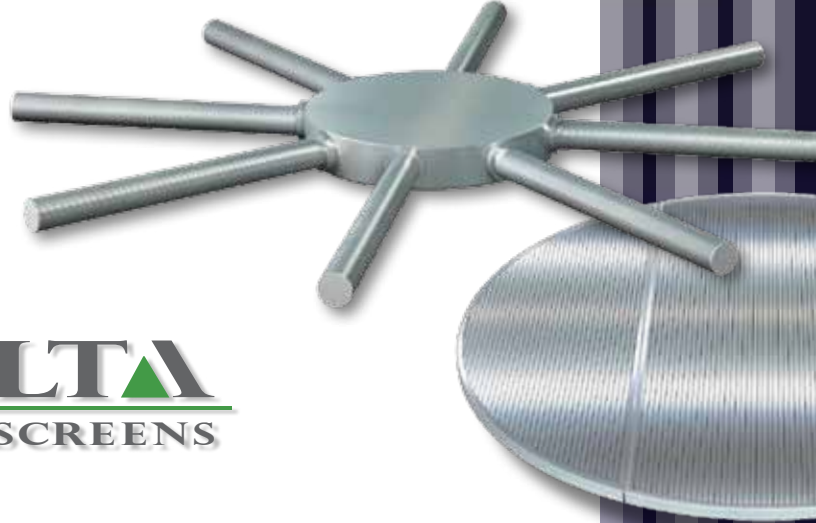

## SETTING A **NEW STANDARD** FOR SCREEN QUALITY.

There are two key aspects that make Delta Screens unique - manufacturing expertise and experience. These create our edge. These create your advantage.

The Delta Screens plant in Houston, Texas was built from the ground up to optimize the production process and eliminate flaws. As such, our products are manufactured using the most advanced technology currently available in the marketplace. This ensures Delta Screens can deliver tight tolerances, precision welds and consistently performing screen products.

We document and archive all essential production data including original mill certificates on all component parts, manufacturing traceability reports and all in-process inspection documents for use in Quality Assurance protocols.

Delta Screens provides a broad selection of options including wrap on pipe, wire wrap, pre-pack and our premium screens to meet your completion challenge.

For water wells you need durable and reliable screens that stand up to the elements and your highest expectations.

## OTHER COMPANIES OFFER HISTORY. WE PROVIDE EXPERIENCE.

The Delta Screens name is new, but we're not new to the screen industry. Our team of seasoned veterans has spent their entire professional careers engineering and manufacturing filtration products for solids control. In fact, our management team has 150-years of accumulated history within the industry.

We know the product. We know the markets. We understand the demands and fully comprehend what's at stake. At the end of the day, we'll gladly compare our product knowledge and market experience to that of any other screen manufacturer in the world.

## A SCREEN FOR EVERY NEED.

Delta Screens specializes in screen manufacturing for the oil and gas, water well, water supply and water treatment markets. Our expanding product offerings include:

### Oil & Gas

- Wire Wrapped and Direct Wrapped Screens
- Premium Screens
- Pre-pack Screens
- Thru-Tubing Screens

### Water Well

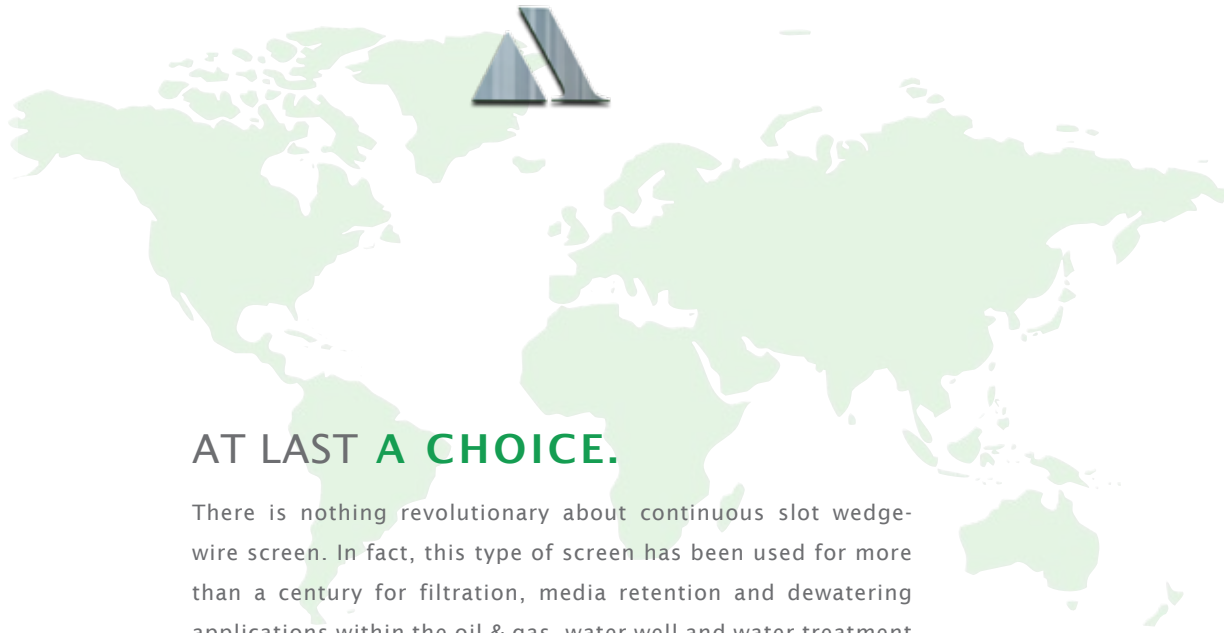

- Stainless Steel Rod Base Screens
- Pipe Base Screens
- Accessories

### Water Supply & Treatment

- Intake Screens
- Rotating Sieves
- Underdrains
- Support Grids
- Header Laterals
- Nozzles
- Pre-Coat Filters
- Resin Traps
- Sieve Bends

Whatever your water treatment process, Delta Screens has the media retention products you need to complete the task, including intake screens, support grids, header laterals and beyond.

## AT LAST **A CHOICE.**

There is nothing revolutionary about continuous slot wedge-wire screen. In fact, this type of screen has been used for more than a century for filtration, media retention and dewatering applications within the oil & gas, water well and water treatment markets. While the premise of these screens has not changed, the technology used to manufacture them continues to evolve.

Now Delta Screens takes this evolution another step forward with state of the art manufacturing technologies and best of breed practices.

This, coupled with 150 years of industry experience, makes Delta Screens a trusted and independent resource with global reach for premium-quality wedge wire screen products.

## PUT US TO **THE TEST.**

We are a world-class screen manufacturer. Our investment in cutting edge technology and highly skilled people is focused on delivering the best screening solution – and value – in our industry.

**Let us demonstrate this for you. Call us with the details of your next project.**
